

1 **Amendments to the Claims:**

2 Claim 1 (four times amended): A multi-layered signage apparatus wherein the material
3 displayed may be quickly changed, comprising:

4 a frame,

5 one or more opaque sheets each containing a graphic image, said sheets
6 removably carried by said frame, and

7 a removable cover sheet adapted to be carried by said frame on top of said
8 opaque sheet or sheets, said cover sheet having a first region wherein alphanumeric
9 information is displayed and a second region which is transparent,

10 whereby the material displayed by said sign includes said alphanumeric
11 information on said removable cover sheet and a graphic image from said one or more opaque
12 sheets, and is readily changeable by either inserting a different cover sheet or by inserting a
13 different opaque sheet having a different graphic image behind said cover sheet,

14 wherein a single viewer looking at said sign through said removable cover sheet
15 sees said alphanumeric information on said cover sheet along with a graphic image on said
16 ~~one or more~~ of said opaque sheets.

17 Claim 2 (canceled)

18 Claim 3 (original): The apparatus of claim 1 further comprising a non-glare plastic lens
19 carried by said frame on top of said cover sheet.

20 Claim 4 (original): The apparatus of claim 1 wherein said graphic image is placed on
21 said opaque sheet in a region that will not interfere with said alphanumeric information on said
22 cover sheet.

1 Claim 5 (four times amended): A multi-layered signage apparatus wherein the material
2 displayed may be quickly changed, comprising:

3 a frame,

4 a plurality of opaque sheets each containing a different graphic image, said
5 sheets forming a stack of sheets, and said stack of sheets removably carried by said frame,
6 and

7 a transparent and removable cover sheet carried by said frame on top of said
8 stack of opaque sheet or sheets, said cover sheet having a first region wherein alphanumeric
9 information is displayed and a transparent second region,

10 said graphic image on each of said opaque sheets being placed on said opaque
11 sheets so that said image does not interfere with said alphanumeric information on said cover
12 sheet, and

13 whereby the material displayed by said sign includes said alphanumeric
14 information on said removable cover sheet and a graphic image from one of said opaque
15 sheets, and is readily changeable by either inserting a different cover sheet or by inserting a
16 different opaque sheet having a different graphic image behind said cover sheet,

17 wherein a single viewer looking at said sign through said removable cover sheet
18 sees said alphanumeric information on said cover sheet along with a graphic image on said
19 one or more of said opaque sheets.

20 Claim 6 (canceled)

21 Claim 7 (original): The apparatus of claim 5 further comprising a non-glare plastic lens
22 carried by said frame on top of said cover sheet.
